

# HIGH SCHOOL PRESENTATIONS

Safe Voices offers the following school-based presentations to help students foster critical thinking skills and develop strategies for healthy relationships. Key themes include advocacy, gender roles and stereotypes, and media literacy.

## CAROUSEL ACTIVITY

Students will brainstorm the dynamics of both dating abuse and healthy relationships. They will develop the critical thinking skills needed to recognize what influences them in their relationships, and strategies to provide support to themselves and their peers.

## HEALTHY COMMUNICATION

Through the use of graphic arts, students will explore different styles of communication and will develop the strategies needed to have effective conversations.

## HEALTHY RELATIONSHIPS

Students will place behavior cards on a relationship continuum, and be able to identify warning signs of when behaviors become harmful, and how to support themselves and their peers in these situations.

## IN THEIR SHOES

Students are provided the opportunity to understand how complicated abusive relationships are, and will be able to identify warning signs of abuse and understand the tactics of the teen power and control wheel.

## IT'S PERSONAL

This video helps students unravel some of the complications surrounding technology in relationships. Students will be able to identify and develop appropriate dating boundaries.

## MAKE UP OR BREAK UP?

Students often experience intense feelings when an intimate relationship ends. Through this presentation, students will improve their ability to identify their feelings, seek support, and develop strategies to effectively and safely end a relationship.

## MEDIA AROUND ME

Through a multimedia presentation, students will learn to evaluate how popular media impacts an individual's view of their peers and dating partners. Students will be exposed to the power of current campaigns that address media bias, and develop strategies to become agents of social change.

## TOGETHER WE CAN

Research tells us that teens are most likely to ask their friends for advice and support. This activity will help students recognize the warning signs of dating abuse, and how to respond safely and appropriately if they are concerned or if someone reaches out to them for support.
